

Our practice and training has been influenced by children and families – what helps and what has worked for them. We seek to evaluate and adapt our training from feedback given.

Some participants comments:-

“The training delivered by the Child Bereavement Service was the best training by an external agency we have ever had”

“..it has made the issues of loss and separation a lot clearer and has given me sound advice on how to help the child.”

“An excellent course.”

“I really liked the practical parts of the session.”

“I now have a clearer understanding of how bereavement affects children & young people.”

The Child Bereavement Service

Training Information

Barnardo's Child Bereavement Service

The Child Bereavement Service was established in June 1998.

The service provides:-

- An Advice Line which any adult who is concerned about a bereaved child can contact for information and advice.
- Training and information sessions for parents and professionals to assist in developing methods of helping bereaved children.
- Individual and group support to children and young people up to the age of 18 who have been bereaved.

Comments from Service Users:-

“The individual counselling has given us our son back”

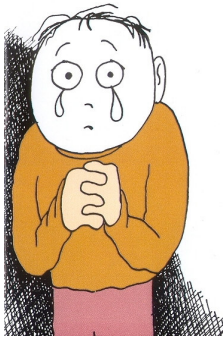

‘I liked that it was a very relaxed environment and felt I could confide in the staff’

Training Options

All of our training sessions can be tailored to suit your individual needs. Topic areas covered include:-

- Developing children's understanding of death.
- Explaining death to children and young people.
- How children cope at developmental stages.
- The bereaved child at school
- Preparation for and involvement in the funeral.
- Trauma and complex grief.

Training Session Costs

Please contact us directly for a quote as training events are designed to meet your specific requirements.
