

# Access all areas... for disabled children, staff and volunteers

Barnardo's believes that disabled children, young people, staff and volunteers should be allowed the same levels of opportunity and access as non-disabled people.

Disability can cause barriers in everyday life. Wheelchair users may be denied opportunities because the places they wish to visit are inaccessible, or people with learning disabilities may fail at tasks they have the potential to perform because they are not offered the right training.

Barnardo's is committed to working with its National Disabled Workers Forum to ensure that the organisation can adapt to the needs arising from a person's impairment. We aim to identify and tackle the barriers which prevent disabled people from leading inclusive lives and to ensure all our service users, staff and volunteers have equal access to education, employment, leisure activities, housing and transport.
