

YOUNG PEOPLE'S HEALTH MANIFESTO

BRISTOL, SOUTH GLOS & NORTH SOMERSET

We want health workers who really listen.

We want to receive individual care... one size does not fit all.

We want to be able to access support with mental health and other health worries at school, college and university.

We want to be able to get help in a crisis, at any time.

We want health services with a diverse workforce that fully meets the needs of Black and Brown young people and LGBTQ+ young people.

We do not want to be left on waiting lists.

We want to be involved in developing online support and in creating digital and social media.

We do not want to be stigmatised or bullied because of our health or support needs.

**We want to know that services are confidential.
We want everyone to know their rights and entitlements.**

BARNARD'S

Changing childhoods. Changing lives.
